

Portable Fuel Caddy

For Fuel Storage “On the Go”

28 Gallon Portable Gas Caddy

Meets all U.S. Coast Guard, UN, and DOT Specifications

The 28 gallon Fuel Caddy is a mobile transportation unit designed to effectively store and transport gasoline. Designed with high terrain wheels, a UL-approved 10' hose, and easy grab handles, these caddies can quickly bring needed fuel around any marina, garage, service station, or job site. Gas caddies are frequently used for military relief operations, boat fuel storage, agricultural fueling, or other remote location fuel requirements.

Portable Gas Caddy Features:

- 28 Gallon Capacity
- 10 ft. (305 cm) UL-Approved Hose with Static Wire
- Spring Loaded Nozzle
- UN Marking “UN3H1W”
- Molded-In Baffle Eliminates Splashing During Transport
- 3/4” UL-Approved Ball Valve
- Mounted Hose Attachment
- Non-Sparking Aluminum Axle
- Easy Grip Handles
- Pneumatic Tires with Nylon Bearings and Hubs
- Vented Cap
- Optional Consumer / Industrial Pumps Available

Portable Gas Caddy Applications:

- Cars, Trucks, Boats, ATVs and Lawn Mowers
- Service Stations
- Fueling Areas
- Remote/Satellite Locations
- Agricultural Areas
- Military Relief Operations
- Fuel Supply for Generators or Equipment
- Emergency Fuel Storage
- Auxiliary Fuel Storage
- Construction Site Fuel Supply

Portable Gas Caddy Specifications:

- **Height:** 41 inches
- **Width:** 27.5 inches
- **Length:** 22.5 inches
- **Capacity:** 27 gallons

Portable Gas Caddy Benefits:

- Completely Self Maintained
- Does Not Require Electricity to Pump Fuel
- Utilized without any Setup or Installation
- Easy Transportation from Site to Site
- Ergonomic Design
- Minimal Risk of Spills or Damage to Tank Accessories
